Members of the Board,

Submitting my final report for the board from the unofficial fire hydrant committee…

1. The county is NOT going to participate in any meaningful way in addressing the operational use of our subdivision's fire hydrants.

2. I propose we put up informational signs immediately in front of each hydrant. I have priced out 12x18 and 18x24, which would cost approximately $40 and $60 each when printed on 3M reflective aluminum base. This pricing does not account for a post to mount the signs on. I was planning on keeping the signs low, at the level of the hydrant and immediately adjacent to the hydrant. Could probably use a pressure treated 4x4 timber, 18" into the ground, budget $13.48 each.

Draft of sign language is attached for your consideration.

Kind Regards,

John
